Summary

Motivated B.Tech Computer Science student with a strong foundation in programming and web development. Skilled in JavaScript, React.js, Node.js, and modern web technologies. Experienced in building academic and personal projects and collaborating in team environments. Eager to apply technical skills to real-world software development problems.

Projects

Online Learning Platform Backend

- Developed a backend system for an online learning platform using Node.js, Express.js, and MySQL
- Implemented JWT authentication, REST APIs, course management, and progress tracking features
- Designed role-based functionality for students and instructors with database integration

HelpAge India Support Website

- Built a multi-page website supporting elderly care initiatives including donation and volunteering pages.
- Implemented interactive UI using JavaScript and designed mobile and desktop prototypes in Figma.

Trippix – Travel Planning Web App

- Developed a travel planning application allowing users to explore destinations, view travel details, and plan trips.
- Designed an interactive and user-friendly interface for seamless travel planning.

QuizBee – Multiplayer Quiz Game

- Built an interactive quiz platform featuring real-time multiplayer gameplay.
- Implemented XP rewards and a teacher dashboard using HTML, CSS, and JavaScript.

Employee Management CRUD Application

- Created a full-stack employee management system to add, edit, update, and delete employee records.
- Developed using HTML, JavaScript (Fetch API), Node.js, and MongoDB.

Logistics Cost Optimizer Application

- Developed a logistics cost optimizer application using HTML, CSS, JavaScript, and React.
- Designed responsive UI ensuring compatibility across multiple screen sizes

Education

ITM Skills University
B.Tech in Computer Science & Engineering

2024 – Present
Navi Mumbai

Skills

Languages: JavaScript, Python, Java, C++

Web Development: React.js, Node.js, Express.js, HTML5, CSS3

Databases: MongoDB, MySQL, Firebase

Concepts: Data Structures, Object-Oriented Programming (OOP), REST APIs

Tools: Git, GitHub, VS Code, Figma
